

09/09

- Weekly sub-meetings begin this week
 - + Notebook in GitHub
- IMS Global Learning Consortium develops all the LTI.
- Our team will be using data from Piazza and edX.
- My main goal for the Data Science team is to integrate the model with the original data.

09/16

- Submit the Data Request Form
- Steps to a Research: Research Problem, Literature Review(Previous work), Purpose of Research, Collecting data, Analyzing and Interpreting Data, Reporting and evaluating research.
- The first presentation will be on 9/28, but the CS career fair could interfere. So alternatives are to be explored.
- Reflections for the journal club presentation this Wednesday
 - Summarizing the paper and answering the given questions were fine and kept the time limit
 - It would have been better if we distributed part earlier before the presentation

09/23

- Start VIP notebooks on github and Peer-evaluations are due on 10/07.
- Submit a data request form to get access to the datasets
- The presentation has been rescheduled to October 5.

09/30

This is the sequence of presentation for the presentation. I wasn't able to attend this meeting. Hence, I requested Harriet to share her notes. We discussed about the presentation and who will discuss which slides in the presentation.

- Discussed presentation flow
- Pratik + Malav (Intro)
- Jisan (DS - Past)
- Harriet (DS - This sem)
- Gautam (UX)
- Ankit + Ritika (Web-dev)
- Conclusion (Malav)

10/07

- Peer evaluation and midterm notebook are due today
- Feedback on the first presentation
 - The presentation went well, and the flow was good. We were able to cover everything.
 - Dr. Lee mentioned that we focussed on prior work, and she asked what the new ideas are and how you plan to achieve them.
 - She recommended adding our new ideas and how we will achieve them in this semester.
 - In the next presentation, keep in mind how the previous work is relevant to what we are doing now and how we are planning to add some current work.
