Q2 - Please briefly explain your reasoning.

Please briefly explain your reasoning.

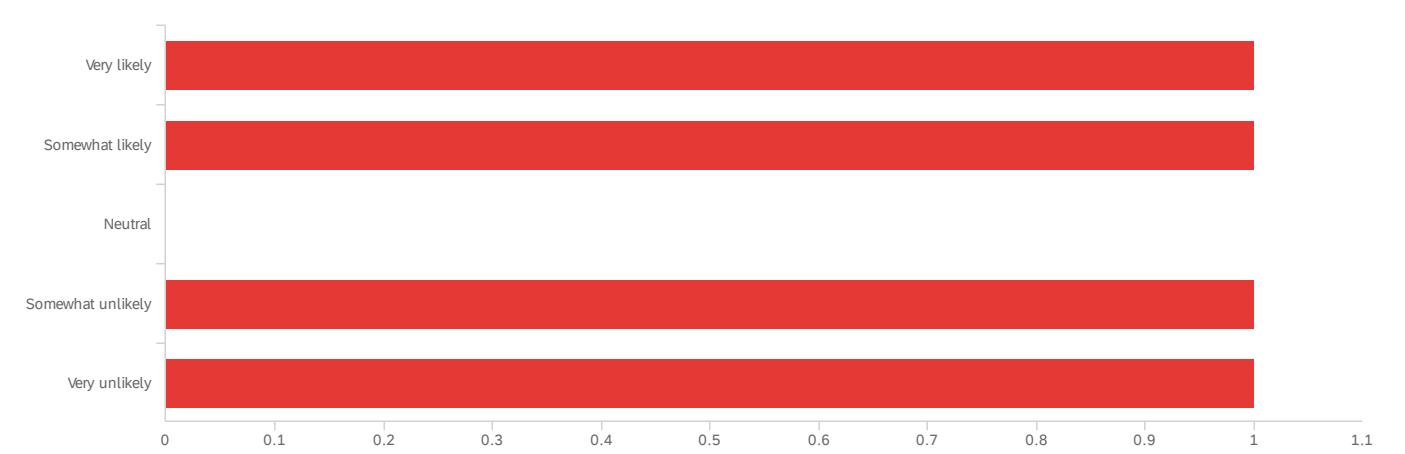

I don't think either really capture the use case of what students use discussion forums for.

I don't know what the bubbles mean. They're kind of garish.

I was not sure how the word bubbles would help me. these cam up later in option 1

Easy to see what the students need help with.

Q7 - Please briefly explain your reasoning.

Please briefly explain your reasoning.

See above.

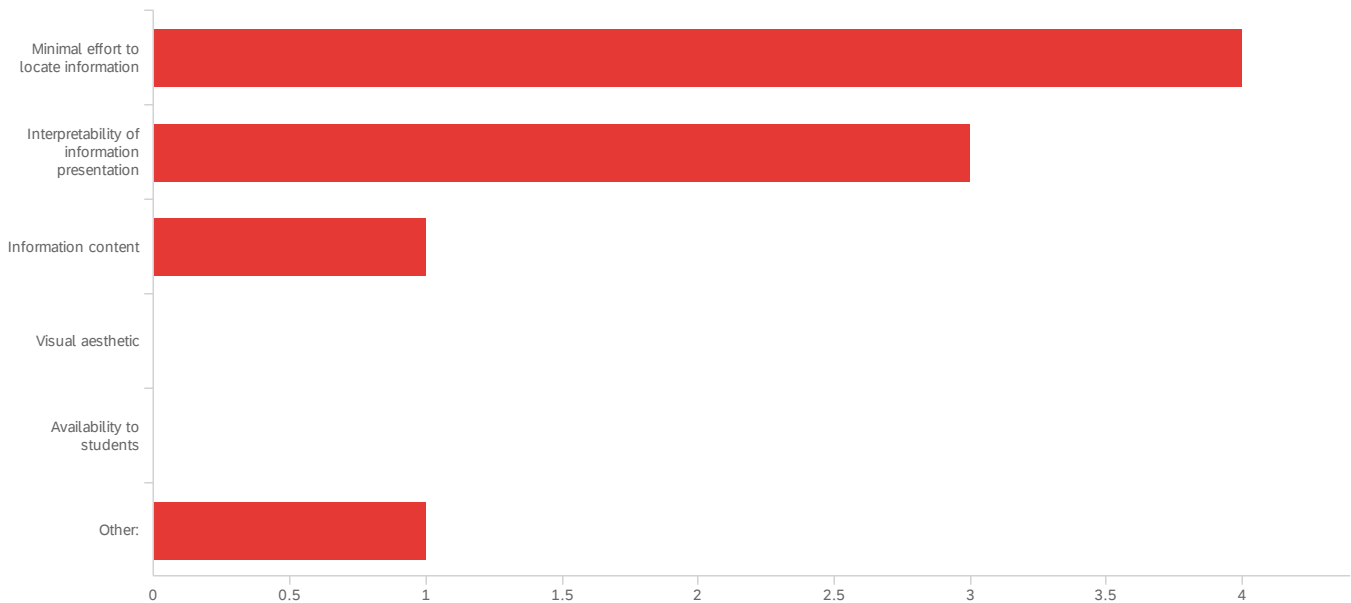

I like to keep it really simple and I would have no reason to include yellow jackets vs dawgs, for example. I like to keep my canvas pages extremely pertinent to my class and as minimalist as possible, so it's easy to understand.

Recently I have been forced to used more online tools - many of which I did not use before. The good part is that I realize I can try things (like trying this app in my class) and in general it is a good thing. The down side is that I have been spending a lot of time recently learning about apps while trying to keep up with my other duties.

i like visualizations to summarize information
